Aviation Security Policy

BGS

Senior management at BGS is deeply committed to ensuring aviation security across all operations. We recognize security as a top priority integral to our corporate values and objectives. This commitment is reflected in our governance strategy and structure, which ensures clear lines of responsibility and accountability in security management.

ACCOUNTABILITY

↘ Clear accountability and responsibilities are defined for all personnel involved in aviation security activities at BGS. Each individual understands their role in maintaining security standards and is accountable for their actions. We guarantee implementation of aviation security legislation and standards, ensuring that our operations meet the highest standards.

RESOURCE MANAGEMENT

↘ BGS allocates sufficient resources to support the implementation and maintenance of effective aviation security measures. We invest in cybersecurity technologies, training, and personnel to ensure robust security capabilities. Additionally, leadership at all levels of BGS is dedicated to establishing and maintaining positive security practices, identifying and addressing security risks proactively to ensure a comprehensive approach to security management.

SECURITY CULTURE

↘ BGS promotes a security culture throughout the organization, emphasizing the importance of security in all aspects of operations. We encourage employees to embrace security as a fundamental value and integrate security considerations into their daily activities. This includes fostering a culture of vigilance and responsibility among staff to enhance overall security posture.

RISK MANAGEMENT AND REPORTING

↘ Ongoing threat assessments and risk management activities are conducted at BGS to identify and mitigate potential security threats. We employ risk-based approaches to prioritize security measures and allocate resources effectively. Additionally, BGS encourages timely and accurate reporting of security incidents by all personnel, with established procedures for reporting incidents promptly. We actively encourage the use of our security reporting system to ensure comprehensive incident reporting and analysis.

INCIDENT MANAGEMENT

↘ Comprehensive incident management protocols are established at BGS to ensure effective response and resolution of security incidents. Clear lines of communication and coordination are maintained to minimize the impact of incidents on operations. BGS is prepared to manage emergencies and incidents effectively, including security-related emergencies, with established emergency response plans and procedures.

CONTINUOUS IMPROVEMENT

↘ Rigorous quality assurance and quality control measures are implemented at BGS to ensure the effectiveness of aviation security measures. Regular audits and assessments are conducted to evaluate performance and identify areas for improvement. We maintain the highest standards of aviation security at BGS, with clear security requirements and expectations established. BGS is committed to continuous improvement in aviation security management, with regular reviews and refinements made to security policies, procedures, and technologies to adapt to evolving threats and industry best practices.
